## The Top 10 Tips Every Owner, Manager and Supervisor Should Know

Many owners, supervisors and managers struggle to find time to ensure health and safety due diligence at work.

Whether you have an in-house health and safety department or it is the responsibility of one or two employees, all organizations must:

- be informed about workplace health and safety issues;
- be aware of upcoming regulations;
- know how to document actions properly; and
- manage workplace health and safety correctly.

In this CADA members-only webinar, Derek Bumstead, Vice President of HASCO Health & Safety Canada, will provide simple suggestions that can help you in your day-to-day work life, and share how they can help protect you in the event that you are ever forced to demonstrate your due diligence for the company.
